

Department of Computer Engineering

Academic Year: 2018-19

Semesters: II

Course Name: Data Analytics

Class: BE

Name of the Faculty: Ms.P.P.Boraste

Name of Method: Poster Presentation

Description: Poster Presentation (Chart Making) is a collective learning strategy where students work together to solve a problem by making a poster and give the presentation for 5-7 minutes. Then solve the query in question/answer session as on assigned topics. This strategy requires students to think about a topic and share the knowledge with their classmates.

This activity was conducted for Unit II topic

Impact of Innovative Method:

It helped students to work in a team and share the knowledge with their classmates.
