About FDP

Engineering education systems need to adapt to economic and social changes to equip students with the relevant skills, knowledge, attitudes and values needed for success in future life and work. The expansion of technology, particularly the beginning of digitalisation, presents new opportunities and challenges to prepare students to be lifelong learners. In this situation, teaching faculties need to understand requirements of industries toward development of students and make them ready for industry. This FDP explores the suggestions of the industries on education systems and explains how teachers and industries can work together to utilize its potential.
