# ABOUT IIT GUWAHATI

After four successful international conferences, Recycle 2025 is here again, the attention of national and international researchers, scientists, and academicians to discuss and learn about the latest innovative ideas and technology for waste management. Starting off as a symposium in 2012, a Waste Management Research Group (WMRG) IIT Guwahati initiative, Recycle, gradually rose to an international conference in a mere five years

Recycle 2025 aims in inculcate awareness about safe practices and the latest technologies for managing and treating solid and liquid waste. Also, the added motivation is 'Inclusivity'—to bring together all the researchers, scientists, professionals, industry personnel, and citizens to bridge the gap between research and practice. Recycle 2025 would provide an excellent platform for discussing and sharing ideas, methods, and approaches for effective waste management, emphasising the core issues of solid waste management, water and wastewater

Indian Institute of Technology Guwahati (IITG), established in 1994, is one of India's leading institutes of technology and excellence. At present, the institute has eleven departments, nine centres, and five schools of interdisciplinary academic centres. IITG has a world-class infrastructure and has state of the art scientific and engineering instruments for carrying out advanced research, IIT's campus is on a sprawling 704.25 acres plot on the north bank of river Brahmaputra, around 20 km from the heart of Guwahati city. Guwahati is connected to many major cities in India by road and air. Institute buses are available from Guwahati City (railway station and airport) to the IITG campus.

## THEMES
